Newsletter May 2019

Editor's Notes

The show season is well underway with several shows in our immediate area and further afield having been held since our last Newsletter. These include Boyne Tannum Orchid and Foliage Society, Gladstone Orchid Foliage Society, Childers Orchid Society, Gympie and District Orchid Society, Bundaberg Orchid Society and of course our own Autumn Show; **the results of which are included in this Newsletter.** Many members and Rockhampton Orchid Society based judges have travelled to these shows, some are dual members and have won prizes and many of course have made some new purchases. It certainly is a great hobby and indeed what makes it more enjoyable for many members is catching up with fellow enthusiasts and seeing their blooms by following the show circuit at this time of year.

In addition, we now are another Newsletter closer to The Rocky Round Up Orchidfest 2019. **The closing date for Registration , which is the 1st August 2019 has been updated,** this will allow the organising committee to be able to now plan with set numbers. Likewise, the vendor list is finalized and a set floor plan has been produced. This list can be accessed via our website www.rockhamptonorchidsociety.com.au We have a good list of nurseries from across Queensland which also includes a major foliage nursery. Some additional sponsorship funding has also been received. On the advertising front the opportunity was taken at all of the shows mentioned above to provide a poster and flyer pack . Likewise, we now have a Facebook Page and when I checked last, the add for Orchidfest had been accessed 565 times; check it out at Rockhampton Orchid Society Inc. So, all is progressing well to the countdown to Rocky Round Up Orchidfest 14-15th September 2019 .

This could be your last Newsletter. Unfortunately, a number of Membership fees are overdue; if you can't make the meetings remember you can now pay by direct deposit . The details are shown below.

ANNUAL FEE \$30-00 (FAMILY/SINGLE) * Due 26 February 2019

Growers' Tip

Air circulation is a term you will often hear when researching or seeking advice from experienced growers on cultivating orchids. If we consider orchids growing in their native habitat it is easy to understand that air circulation would be a natural component of their requirements to function effectively. The air moving around their leaves can provide water, cooling, drying and nutrient laden sustenance. When we put our orchids be they species, or hybrids in a greenhouse we are effectively placing them in a controlled environment. Hence, it is then up to us to provide their requirements to achieve their full potential and to keep them free from diseases like fungal infections. Just like providing fertilizer and water, air circulation is essential. It can be achieved two ways, either naturally or artificially. The design and placement of a greenhouse are the two main elements of providing air circulation naturally. Before you build, consider the direction of the prevailing wind and how you can control it or in some cases limit it to your orchid's benefit. Many challenges such as, other buildings and trees

that limit the breezes will be encountered by the suburban grower. Greenhouses with an apex

General Cultural Guide April/June

<i>* Information is general in nature and given in good faith.</i>	Watering/Weekly	Fertilizer/Weekly	Pest/Disease Control	Comments
Cattleya	2-3times weekly	Blossom booster Low Nitrogen	Flower Thrips Yates Success or Pyrethrum on buds	Weather is variable at this time of year. Reduce watering frequency as temperature cools.
Dendrobium Hard cane		Reduce fertilizer and cease by Winter's onset	Flower Thrips Yates Success Pyrethrum on buds	Weather is variable at this time of year. Reduce watering frequency as temperature cools.
Dendrobium Softcane	Once to twice weekly	Cease fertilizer		If fertilizer is applied from now on, plantlets will form rather than flowers
Phalaenopsis	2-3 times weekly	Reduce fertilizing with cooler weather. Low nitrogen	Preventative Fungicide if wet cooler weather Mancozeb	Weather is variable at this time of year. Reduce watering frequency as temperature cools.
Vandaceous	Water daily in hot weather 2-3 days if cooler	Balanced fertilizer if still in growth Cease if weather cools	Flower Thrips Yates Success or Pyrethrum on buds	
Oncidium	In hot weather, every 2 days if cooler 2-3	Balanced fertilizer if still in growth Cease if weather cools		
Paphiopedilums	Every 2 days in hot weather. 2-3 times weekly in cooler weather.	Balanced fertilizer	Preventative Fungicide if wet cooler weather Mancozeb	
Catasetinae	2-3 times weekly	Fertilizer should cease once flowering has initiated.	Plants will defoliate if weather cools significantly. (Normal reaction)	Watering should be phased out completely after flowering is finished.

**Next Monthly Meeting Tuesday ^{28th} May
Starts 7.30pm.**

**Notice to Members: Please assist if you can with cleaning the hall
after the meeting 22**

R.O.S.I Growers Group Report

After several showery days, we had fine weather for our visit to Graham and Maxine Maunder's residence on Sunday 28th April. 59 members attended and we spread ourselves in the shade of the huge Poinciana. As usual, there was much to see in the garden which featured many striking bromeliads. (Maxine's passion!)

Graham had a very beautiful *Bulbophyllum* Elizabeth Ann 'Buckleberry' flowering and happy in its position hanging from a branch of the Lemonade tree. A flowering *Ctt.* Fitz Eugene Dixon (*Ctt.* Portia x *C. walkeriana*) caught my eye in the Orchid house.

I presented a short segment on *Ctt.* Chocolate Drop. The Reserve Champion of our Autumn Show was *Ctt.* Chocolate Drop x *Rlc.* Lemon Tree owned by Rosemary Wines. I mentioned many of the *Ctt.* Chocolate Drop crosses owned by other members.

The main topic for the afternoon was repotting Cattleyas and also advice on dealing with very overgrown cattleyas. Trevor demonstrated repotting a plant to a group of newer members. A member brought along 2 plants as she was concerned about their growth. They were pronounced healthy by an experienced grower. New growers are welcome to bring along their problem plants as there are always experienced growers present who are willing to give advice.

The Club Display for the coming September Conference/Show was discussed and several members from Growers Group have volunteered to help with the R.O.S.I display.

The raffle was really well supported and we had 89 draws. Thank you to all who donated. Thanks, once again to Maxine and Graham for hosting our group.

Our next outing will be at 2pm, **Saturday**, June 1 at the residence of Rosemary Wines, 53 Angela Road, **Rockyview**. Rosemary's narrow driveway entrance is **on the left immediately at the end of the neighbour's white picket fence**. Members are welcome to park on the lower area of Rosemary's yard as long as there hasn't been heavy rain beforehand. Also be aware of the Iron Bark trees that could drop branches. Please leave parking space closer to the house for people who are walking challenged. Remember to bring a chair, hat and plate of food to share and donations to the raffle are always welcome.

One of the topics for June 1 will be *Bulbophyllums*. If anyone has a flowering *Bulbophyllum*, please feel welcome to bring it along.

See you at 53 Angela Road, Rockyview on Saturday June 1 at 2pm.

Margaret Handley

Vale Brian Weaver

Well-liked and respected member of the Rockhampton Orchid Society Inc. Brian Weaver passed away recently. Brian and wife Lorraine were very active members of the society since joining in July 1997 after retiring and moving from Blackwater. Brian was always ready to lend a hand at society events and functions. Brian was also life member of the Blackwater Orchid and Foliage Society. Many members of ROSI attended Brian's large funeral to show their respects to Lorraine and their family. Those gathered heard how Brian was a much-loved family man and also well respected amongst the wider community. He will be sorely missed.

***Den.* Mangosteen**

Species of the Month

The species of the month is *Aerdis quinquevulnera*. A plant of this species belonging to Moyna and Bill Richardson was the Champion Orchid at our recent Autumn Show so being a species, I thought it is quite apt to review for this month's newsletter. *Aerdis quinquevulnera* is a species of the *Aerdis* genus that belongs to the Vandae sub-family. Its membership of this sub-family can be easily discerned by its monopodial growth and aerial roots. Like many Vandas, it has a propensity to develop secondary growths and will readily grow into a specimen-sized plant such as, the plant at the Autumn Show. They are relatively easy to grow once started in a Vanda-basket with large (20-40 mm) medium such as bark charcoal, or rock for initial support. As mentioned above, if the plantlets are left on the main plant it will become a specimen that will never need re-potting. On the other hand, the plantlets can be removed and multiple plants can be derived from the original if so desired. Like most Vandas it likes plenty of water and fertilizer in the growing season (Spring/Summer) and can be watered daily at the height of Summer as being monopodial it has a minimal storage structure (lateral roots) unlike orchids with rhizomes (sympodial) such as, Cattleyas. It hails from The Philippines and New Guinea. With its arching pendulous inflorescences of up to 30 pink/lavender flowers it is easy to grow and a delight for any orchid grower to have in their collection.

Life Membership Award

At last month's meeting Life Membership was awarded to Barry and Faye English. President Jeff Bloxson presented certificates and badges to Faye, who also received them on behalf of Barry. The ROSI membership had previously ratified that they should be honoured with this award due to their sterling service to the society over many years. This included Faye serving as Secretary for 5 years and both Barry and Fay serving as the society's property officers for 14 years; which involves making their home available for members to collect growing supplies and also setups for Show-sales. In addition, of late Barry and Faye have been responsible for the stewardship and introduction of the computerisation of the Show judging and plant barcoding system. Congratulations and well deserved!

Autumn Show Trophies Presented

*See Show Results for details.

Bunnings BBQ #2

The second Bunnings BBQ for the year was held on Saturday 27th April and from all reports it was again very successful and a good time was had by all who participated . Thanks to members who manned the stall and to those who donated plants for the raffle. Details will be given at the next meeting in the Treasurer's Report.
