Newsletter – May 2022

I am starting this newsletter the day after our Autumn Show concluded. And what a fantastic show it was, credit to the planning and organisational skills of our president Jeff and all members who worked hard for this great success. From the members who set up and pulled down the show, to Maxine and Nat who worked hard on creating wonderful flower arrangements for sale and the members who supplied the flowers and foliage, to the members at the door entry, raffle table, plant sales area etc. To Barry & Trevor on the Orchid Supplies Sales Table. To Trish & Trevor who handled the work processing the members plant and sale labels prior to the show, to the judges local and from Gladstone, Bundaberg, Sarina, and Mackay for their effort in judging the vast array of orchids and foliage entries, to Sharyn who was steward in the foliage/floral art sections. To Trish and her assistants who handled the printing of prize cards etc. To the members who entered plants, the ones who made the container displays, and created wonderful foliage art. To the members who put together our stunning club display. To Neil Fisher for his great commentary of our show on Channel 7 and article in CQ Today. To our out-of-town vendors - Alice, Thomas, Max, and Sue who travelled to bring an array of plants for sale. And a big thank you must go to our visitors with door numbers at 930 for the two days. And I know I have probably missed someone along the way, so a big thank you to all of you for the fantastic effort with presenting another amazing show by ROSI.²¹

In this newsletter I have included the winners list from our Show. Well-deserved congratulations must go to Peter & Toni Jenkinson for taking our Grand Champion Orchid with their amazing *Bulbophyllum medusae*, which also won Best Specimen and Best Exotic Species. I have included some of the show photos in this newsletter with others following in future editions.

This month's genera I have covered is *Stanhopea oculata*, a species that was registered in 1832.

The last grower's group was held at the home of Ray and Gay Bills, rain threatened on the day but happily did not eventuate. A good number of members attended with two visitors from Mackay. Ray showed members how to repot orchids and a few took a plant home, Moyna demonstrated how to make a corsage and Maxine showed members how to make a basic flower arrangement. The afternoon rounded off with the drawing of the raffle and many members were able to take home a plant or two. The next group gathering will be held at Moyna & Bill Richardson's home and will be on Saturday 28th May commencing at 2.00pm. Remember a chair, something to share for afternoon tea, a raffle prize or two.

-Editor.

**Next Monthly Meeting: Tuesday 24th May 2022.
Starts 7:30pm.**

Notice to Members: Please assist if you can with cleaning the hall after the meeting.

Any original article contained in a Rockhampton Orchid Society Newsletter may be re-printed for educational or information purposes, as long as, the Author and Newsletter & Edition are referenced.

Growers Group: Last month's meeting was held at the home of Ray & Gay Bills. Ray gave a comprehensive demonstration of his method of repotting his orchids which members found very informative. In preparation for our upcoming Autumn Show Maxine gave a demonstration of a floral art display while Moyna showed those interested how to do corsages.

The next Growers' Group meeting will be at Bill & Moyna's home on 28th May.

General Business:

Autumn Show – The Frenchville Sports Club has advised that it will be hosting a football carnival on the weekend.

Members were warned that parking could be a problem, particularly on Saturday night for the dinner.

Due to staff shortages which has become all too common now the bar in the conference room will not be operating on Saturday night. Anyone requiring drinks will need to go to the main bar.

The dinner on Saturday night will be an alternate drop main and dessert.

Sales area will be open until 7.00pm. The judging area will be closed off at 5.00pm.

Plant Commentary: J Glover commented on the tabled orchids and talked a little about what judges are looking for when judging orchids.

Exhibitor's Raffle: T & M Handley

General Raffle: R Bentley, L Dawes, J Bloxson, D Eggleshaw x 2, D Simpson, M Black, A Cunningham, G Breingan & J Bennett.

Meeting closed at 9.24pm.

Next Committee meeting 7 pm on 3rd May at P & T Jenkinson's residence.

Orchid Species: *Stanhopea oculata*

In this month's newsletter the genera I have picked to cover is *Stanhopea oculata*. At the April Meeting a well grown plant owned by John & Sharyn Frisch took out the Popular Vote win in the Advanced Species section.

Information below from www.orchidspecies.com

Stanhopea oculata [Lodd.] Lindley 1832 **SUBGENUS** *Stanhopea* **SECTION** *Wardii*

They like semi deep shade and perform well in sphagnum moss with some wood chips and charcoal added. Found from Mexico, Guatemala, Belize, El Salvador, Honduras, Nicaragua, Colombia, Venezuela, and southern Brazil. as a medium sized, warm to cold growing epiphyte on trees in humid forests or as a terrestrial on cliffs in rocky soil at 1000 to 3000 meters in altitude with obliquely ovoid, pseudobulbs carrying a single, apical, elliptic or broadly lanceolate, acute or acuminate, plicate, gradually narrows below into the elongate, petiolate base leaf, it also requires a wire basket as the showy, vanilla to chocolate scented, waxy flowers descend from the bottom on a pendulous, 10" [to 25 cm] long, 5 to 9 flowered inflorescence arising on a mature pseudobulb with several distichous, inflated sheaths occurring in the summer.

Information below from www.travaldo'sblogspot.com

Stanhopea oculata is native to Mexico, Belize, Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, Panama, North America, and Brazil. In Mexico, the natural habitat of these plants is the eastern edge of the Mexican Plateau, from where it extends from the states of Puebla and Veracruz to the regions of Chiapas located between the mountains. In Belize, they grow in the districts of Cayo and Toledo at altitudes of 400-750 m, found on trees, stumps, decayed boughs, or on rocks in wet deciduous forests. In Guatemala, they are found near Coban in the state of Alta Verapaz, in humid forests, growing epiphytically or on rocky ground, at an altitude of 1500 m. In Guatemala, they are also found in coastal areas along hills above the Pacific Ocean. In El Salvador, they grow in the department of Santa Ana at Cerro Montecristo, at heights of 1600-2000 m. In Nicaragua this species grows in the province of Nueva Segovia. Plants were harvested at Cerro El Sangarro and between Ocotol and Jalapa at heights of 960 m. They grew on trees at heights of 1.5-4.6 m above the ground. In Panama, it is found in the province of Coclá in the area north of El Valle de Ant, at 1000 m, in the damp forests of the highlands, and grows on the tops of the tallest trees. In Venezuela, they met at Caripe at an altitude of about 910 m, and between Guacharo Cave and San Francisco. In Brazil, they are found only at low altitudes in the state of Amazonas.

Stanhopea oculata

Articles that were in CQ Today before Show

I wrote & submitted first article and Neil Fisher did the second article

The Rockhampton Orchid Society will present its annual Autumn Show this weekend for the first time since Covid.

Colourful orchids on show

By the Rockhampton Orchid Society

More orchids, hybrids, 20 April and Sunday, 1 May. The Rockhampton Orchid Society will present its annual Autumn Show at the Forthcliffe Sports Club, North Rockhampton. The two-day show will be open on Saturday, from 10am and Sunday from 9am to 5pm. Underpinning the 2020 and 2021 Autumn Shows were cancelled due to Covid, but we were fortunate to host our 2022 Spring Show. The society, which has been in operation for 68 years are proud to present two shows per year, and they will again present their 2022 Spring show in September. Shows are held in autumn and spring which allows our visitors the opportunity to see genera which flower specific to that season, as well as the chance to return that flower multiple times per year. One of the genera that flower well during Autumn is the Dendrobium (hard case variety), the soft case variety known as the Spring Show (Dendrobium comes in many classes - Phalaenopsis, Ascocentrum and Spiranthes types, Australian and Exotic species as well as other

varieties. There will also be a vast range of many other genera suited for our visitors to admire. The club will also present an orchid display in the store as well as Orchid Container Displays, floral arrangements and corsages prepared. Rockhampton Cake Decorations will also have a display and cake sales. There will be orchid and plant sales of members' plants and also two sets of non-members. Most orchids from Britain and Alice's orchids from Louisville will be in attendance selling many varieties of orchids. There will be the Orchard Fostering Supply tables on offer over the two days. Visitors will have the opportunity to win a beautiful flowering orchid in the first lucky draw. Prizes and the major draw will give will be a garden trailer filled with gardening supplies and plants. Entry is just \$4 for adults and children are free. For further details visit our website www.rockhamptonorchidsociety.com.au

A display from a past Rockhampton Orchid Society show.

Spider Fern.

Perfect weekend for show

I can see that many people who read this column are probably never visited here a show or show. It can be a very rewarding experience, with a wide variety of beautiful orchids, plants, ferns, trees, flowering general plants, Cut Flowers and floral arrangements many of which you will never see in local nurseries. Visitors will see the start of the Rockhampton Orchid Society Autumn Show and if you ever admire the beauty of plants the display by the club members will take some beating.

Orchid on show.

Tillandsia Silver Queen.

Exoticia Samartina.

Almost a feature in displays in the Rockhampton but for gardeners it is one place that has a lot to be recommended with gardeners it would be the orchid. Orchids are not just beautiful plants around flowering year which are beautiful. Orchids are not just beautiful plants around flowering year which are beautiful. Orchids are not just beautiful plants around flowering year which are beautiful. Orchids are not just beautiful plants around flowering year which are beautiful.

There are many more orchid varieties of the best known and most colourful of Acacia. The orchid is not just beautiful plants around flowering year which are beautiful. Orchids are not just beautiful plants around flowering year which are beautiful. Orchids are not just beautiful plants around flowering year which are beautiful.

They are graceful hanging ferns with lush green fronds that will make a statement of shade ferns. These ferns are best described as epiphytic which grow on trees and are found mostly in rainforest or in moist situations in other forests. They make extremely decorative basket plants and are ideal for gardeners. The two species can be grown in outdoor gardens under suitable conditions. Hard ferns are also available. Beautifully a great green plant. Tillandsia that change colour when coming into flower. Tillandsia are used in outdoor and indoor arrangements. Tillandsia are mostly tree dwellers and can be attached to almost anything. I think most gardeners would be surprised by beauty of some of these plants.

The orchid show is being held at the Forthcliffe Sports Club from 9am to 5pm on Saturday (22nd) and from 9am to 5pm on Sunday (23rd).

The orchid show is being held at the Forthcliffe Sports Club from 9am to 5pm on Saturday (22nd) and from 9am to 5pm on Sunday (23rd).
