## Newsletter – October 2022

Well, what do I say??? I have left my editorial to almost the completion of the newsletter, usually this is where I commence first, I am a bit of a loss how to start.

Our Spring Show has passed and was a very successful show with almost 800 visitors through the doors over the two days. Congratulations to Ken & Rosie Smith for taking out the Grand Champion Award with their *Dendrobium* Mousmee a beautiful specimen plant, and to Bob Jenkins & Shirley Kuhl on their Reserve Champion winning orchid *Dendrobium* Native Gold. From the photos I received from several members there were many beautiful orchids and foliage entered and some very well-deserved winners. In this newsletter I will have some photos with more to follow in the November Newsletter.

Sadly, this show had a very sad start with the passing of John Frisch at 6.45am on Friday 23<sup>rd</sup> September while he was getting their orchids and foliage ready to take to the show. 75

I couldn't attend the show due to a fall the Saturday prior which landed me in hospital for fourteen days with a badly shattered femur and dislocated left elbow, but through talking to our members there was a very sombre atmosphere at the show. The passing of John has left a huge hole in the society, not only was he our technical advisor, gave very informative plant commentaries, the knowledge he passed onto members was enormous, and his breeding of various genera well known. He was a figure larger than life and will be very sadly missed by all. Jeff Glover has compiled a tribute to John. Our sincerest condolences to Sharyn and family. I was unable to attend but watched the live stream on my phone and listening to the eulogy John lived a very full and fulfilling life.

*Jeff Bloxson created the beautiful wreath (below) out of John's orchids that was placed on top of his coffin.*

Sharyn had asked on that morning of the show if any members could bring some of John's plants down for sale at the show and we would like to thank the members who assisted. Michael bought two of John's cattleyas for me. I believe Sharyn probably has more plants for sale if you wish to contact her.

**-Sandra Rowcliffe - Editor.**

**Next Monthly Meeting: Tuesday 25<sup>th</sup> October 2022.  
Starts 7:30pm.**

**Notice to Members:** Please assist if you can with cleaning the hall after the meeting.

*Any original article contained in a Rockhampton Orchid Society Newsletter may be re-printed for educational or information purposes, as long as, the Author and Newsletter & Edition are referenced.*

## 22<sup>nd</sup> Australian Orchid Council ORCHID SHOW

### STOCQ societies' involvement in the recent AOC conference show

*By John Rees*

The AOC Conference Show was held Friday to Sunday 2nd to 4th September.

It was planned that South Queensland orchid societies would host the event and Lavina and I were, for a time, involved in its organisation.

Four STOCQ societies and Robertsons Orchids staged displays. They were some of the most significant of the show:

- Calliope display probably had the most blue ribbons of any display. This was set up by four of their members.
- Six members of Rockhampton Orchid Society staged a display which also reaped plenty of blue ribbons.
- Maroochydore Orchid Society demonstrated a lot of initiative and also reaped plenty of blue ribbons. Glasshouse Country Orchid Society had the biggest display of the show and came second to the display of OSNSW.
- Members of Glasshouse also provided plants for Robyn Brown to put up a display at the show entrance. The organisation of the event was excellent based on a measure of speakers, show and commercial stalls. Registrants had a great time.

Originally, we had become involved in the committee organising this and we were pushing the Golden Beach Stadium and neighbouring Rugby Union club house as the venue. Unfortunately, a Sunshine Coast grower wrote to the committee stating that the venue on the Sunshine Coast was not big enough and that a venue in Logan would attract lots of people from the Gold Coast. Unfortunately, the writer was unaware that there was a stadium holding three international basketball courts in Golden Beach and was referring to the Kawana Community Hall where an Orchidfest was held.

This letter was presented triumphally at a meeting, and we did not like the way it was presented and quit the committee soon after. Robyn Brown from Glasshouse COS stayed on, and she had a very significant involvement in the AOCC's organisation and deserves a lot of congratulations.

Sadly, even though it was a great success as an event, it had just over 1500 through the door. I understand that some societies in the STOCQ area would have more than that attend their society shows. The people who were going to turn up from the Gold Coast didn't and few came from the low socio-economic area where it was held either.

I understand that the event has paid for itself and am, in some ways, glad it wasn't held in Golden Beach as the organisation would have been huge and I'm getting too old to do that sort of thing.

**Congratulations to the STOCQ societies who displayed.**

## Orchids of the month

### ***Dendrobium nobile* (Soft Cane Dendrobium)**

Article extract courtesy of 'Orchid societies NSW.'

*I am featuring this genus in this month's newsletter, as it is one of the genera which is only presented at our Spring Show with flowering between August to October, and because we have lost the Societies strongest grower on this genera, John Frisch. We will miss the tables overflowing with John's flowering beauties and the public will miss able to buy some of his breed plants.*

Soft cane dendrobiums originated from Asia. They are part of the very large *Dendrobium* genus and are a little different to most peoples' idea of orchids. Every year they produce new "canes", between 40-100 cm long, with alternating pale green leaves. The flowers are generally produced on the previous year's leafless canes, although the latest breeding has produced plants that flower on the current cane. Why these orchids are so popular then becomes immediately obvious. Their colour ranges from pure white to yellow, pale pink to purple, all depending on their parentage. Often the lip is a deep purple with shading to paler petals. The effect is very attractive. Clever crossing of orchids has increased the colour range and Sydney has an ideal climate for them.

Soft cane dendrobiums will grow happily in most back yards. They need to be potted in a mixture of treated pine bark or orchid mix. The mix needs to be rapidly draining or the roots will not grow, and they like to dry out between waterings. This does not harm the plants at all and in fact they seem to thrive on neglect. For feeding they need half-strength fertiliser every one to two weeks; any fertiliser will do. In winter, watering and feeding should be decreased or ceased depending on their situation. Older hybrids tend to produce plantlets instead of flowers if over watered in winter. As with most orchids they should be watered frequently when in active growth or in flower and much less when dormant.

Light is important to induce flowering but preferably filtered light in summer, so the foliage does not burn. Under trees or open bushes is ideal and the plants grow very well in hanging pots where there is good air movement. They can also be grown in a shade house under 50% shade cloth. Once the plants are in bud, move them to a sheltered area such as a veranda to keep rain off the buds. Water sitting on the buds can induce fungus with spotting or even bud drop. Good results have been achieved by hanging the plants on eastern facing fences and the clothes lines.

They also grow very well on host trees (trees that don't shed their bark).

*A majority of the above softcanes were John Frisch's, sadly we may not see overflowing tables like this at future Spring shows.*

## ***Dendrobium palpebrae* Lindley 1850 SECTION *Densiflora***

Source – [www.orchidspecies.com](http://www.orchidspecies.com)

Common Name - The Brow-Like Dendrobium  
In Thailand - Ueang Matchanu

Flower Size about 1 1/2" [about 3.75 cm]

This species is often confused with *D. farmerii* as the flowers and growth habit are very similar. The major difference is the lip that is more ovate in outline. In addition, the lip has low side-lobes, and the base has the hairs that John Lindley described "like eyelashes" - hence the specific epithet palpebra (eyelid).

This species is from Bangladesh, eastern Himalayas, Myanmar, Thailand, Laos and Vietnam at altitudes of 800 to 2500 meters where it is widespread as a medium sized, warm to cold growing epiphytic species with clustered, rather slender to subclavate, sulcate stems enveloped by membranous sheaths carrying 2 to 5, towards the apex, lanceolate to oblong, acute leaves that blooms in the spring and late summer on a 3 to 6" [7.5 to 15 cm] long, pendulous, 6 to 15 flowered inflorescence.

This species appreciates a drier winter followed by heavy water and fertilizer after spring blooming.

## ***Gongora grossa* Rchb.f. 1877 SECTION *Grossa***

Source – [www.orchidspecies.com](http://www.orchidspecies.com)

Common Name - The Robust Gongora

Flower Size 1.4" [3.5 cm]

Found in Venezuela, southern Colombia and western Ecuador in tropical moist rainforests at elevations of 50 to 1300 meters as a medium sized, hot to cool growing epiphyte with swollen, longitudinally ribbed pseudobulbs carrying 2 apical, broad, thin, plicate leaves that gradually narrow to a conduplicate petiole below that blooms in the late spring and early summer on a basal, pendant, 12" [30 cm] long, several flowered inflorescence arising on a mature pseudobulb and carrying fishy, musty and sweaty gym clothes scented flowers.

This species has the longest horns of the genus.

# Vale John Frisch

By Jeff Glover

I first met John and Sharyn when we became members of the original Capricorn Orchid and Foliage Club in 1983 and then again when Norma and I joined ROSI in 1986. So, it has been a long friendship associated with our common interest in virtually any collectible plant, orchids or foliage. Both families' long-suffering children can attest to being dragged to shows and nurseries while on family holidays as being a feature of the lifestyle we shared; a fact that I was only recently reminded of by John and Sharyn's daughter Shelly. In addition, in my case with John, we also had a common passion for fishing. There was often a pile of scales so to speak, after we caught up at monthly meetings and other society functions. I did always enjoy John's company.

For many years, John and I shared the monthly talks at our meetings and in this alone John will be sorely missed by our society. In reality, John has been a larger-

than-life part of the Society since when he and Sharyn joined in April 1981. John was made a Life Member in 1998. In many ways John was for want of a better description the Society's Technical Reference. He was the 'go-too person' for plant problems. His knowledge on pests and diseases and the required remedies was unsurpassed. Not only was this knowledge sought after by the Society's members, but by many in the greater Orchid Community. This was bolstered of course, by his professional life as a research scientist at the CSIRO Laboratories in Rockhampton, at which Dr. John Frisch, was acknowledged world-wide for his work in cattle genetics.

He gave freely of his time, also being a guest speaker over the years at orchid conferences and gardening events throughout Queensland and Interstate. His forte in orchids was the Softcane Dendrobium. He bred many hybrids and his ability to grow these plants into beautiful specimens was universally admired. His plants were the centre piece of our Spring Shows and the chance to see them was a highlight for many show visitors. John will be greatly missed by the society's members and the wider orchid world, but his plants and their progeny will serve as testament to his memory.

The recent Spring Show was as usual an outstanding success; all the while being a time of reflection, as John's passing was ever present in members' minds. Many were shocked at the news; yet for those who were close to John it was not a surprise as John had battled his fair share of serious debilitating health problems over the last 10 to 15 years. John loved the Shows, and his absence was even felt by many of the public who looked forward to having a catch-up with our unofficial 'Plant Doctor'. His passing while preparing to pack for the Show was in many ways fitting for a man who despite his health issues was always on the go until the very last. He wouldn't have had it any other way.

**RIP John**

# 2022 SPRING SHOW CHAMPIONS TABLE

## 2022 SPRING SHOW RESULTS

### Laeliinae

**Class 1.01 - Laeliinae, Standard shape, over 110mm, predominately White**

1st	<i>Rlc. Burdekin Jewel</i>	R & G Bills
2nd	<i>Rlc. Burdekin Jewel</i>	P & M Bennett

**Class 1.02 - Laeliinae, Standard shape, over 110mm, predominately Mauve/ Pink shades**

1st	<i>Rlc. Glenlee Passion</i>	R & G Bills
2nd	<i>Rlc. Burdekin Future</i>	P & M Bennett

**Class 1.03 - Laeliinae, Standard Shape, over 110mm, predominantly Yellow/Orange**

1st	<i>Rlc. Legend of Maui</i>	J & N Glover
2nd	<i>Rlc. Golden Reign</i>	J Scott

**Class 1.04 - Laeliinae, Standard Shape, over 110mm, any other colour combination**

1st	<i>Rlc. Chunfong Apple</i>	J & N Glover
2nd	<i>Rlc. Golf Green</i>	D & R MacKenzie

**Class 1.05 - Laeliinae, Standard Shape, 75mm to 110mm, predominantly White**

1st	<i>Rth. Topaz Classic</i>	J & M Bloxsom
2nd	<i>C. Mari's Magic</i>	Y & G Manning

**Class 1.06 - Laeliinae, Standard Shape, 75mm to 110mm, predominately Mauve/Pink shades**

1st	<i>C. Lana Coryell</i>	R & G Bills
2nd	<i>C. Elusive Dream</i>	J & N Glover

**Class 1.07 - Laeliinae, Standard Shape, 75mm to 110mm, any other colour combination**

1st	<i>Rth. Shion Free</i>	T Monks
2nd	<i>Rth. Redland Nugget</i>	R & G Bills

**Class 1.08 - Laeliinae, Standard Shape, under 75mm, any colour**

1st	<i>Rth. Dal's Emperor</i>	P & M Bennett
2nd	<i>Rth. Shion Free</i>	R & G Bills

**Class 1.09 - Laeliinae, Cluster, not less than 5 blooms per stem**

1st	<i>Ctt. Trick or Treat</i>	R Jenkins
2nd	<i>C. Hsinying Cognac x Gct. Why Not</i>	J Scott

**Class 1.10 - Laeliinae, Non Standard, any other**

1st	<i>Rlc. Naomi's Delight</i>	J Scott
2nd	<i>C. Jungle Gem</i>	J Scott

## Vandaeae (excluding Phalaenopsis)

### Class 2.01 - Vandaeae, Standard shape, blooms size over 70mm

1st	<i>V. Susan Ong Ah Moor</i> x <i>V. coerulea</i>	K Clarke
2nd	<i>V. Gordon Dillon</i>	K & R Smith

### Class 2.02 - Vandaeae, Standard shape, blooms 35mm up to 70mm

1st	<i>Van. Tien's Delight</i>	J & N Glover
2nd	<i>V. Boonyarit Red</i>	M & B Richardson

### Class 2.03 - Vandaeae, Standard shape, blooms size under 35mm

1st	<i>Van. Pine Rivers</i>	J & N Glover
2nd	<i>Van. Pine Rivers</i>	J & M Bloxson

### Class 2.04 - Vandaeae, non-standard blooms size over 70mm

1st	<i>Pda. Cedrick Saunders</i>	T & M Handley
-----	------------------------------	---------------

### Class 2.05 - Vandaeae, non-standard shape, bloom size 35mm to 70mm

1st	<i>Pda. Beverley Woods</i>	M & B Richardson
-----	----------------------------	------------------

### Class 2.06 - Vandaeae, non-standard shape, bloom size under 35mm

1st	<i>Pda. Pinkie</i>	K & R Smith
2nd	<i>Pda. Pinkie</i>	K & R Smith

## Dendrobium

### Class 3.01 - Dendrobium, Eugenanthe type (soft cane), predominately white

1 <sup>st</sup>	<i>Den. White King</i>	M & B Richardson
2nd	<i>Den. Saotome</i>	D & R MacKenzie

### Class 3.02 - Dendrobium, Eugenanthe type (soft cane), predominately purple/mauve

1st	<i>Den. Sunburst</i>	T & J March
2nd	<i>Den. Fraser's Angel Blush</i>	J & S Frisch

### Class 3.03 - Dendrobium, Eugenanthe type (soft cane), any other colour

1st	<i>Den. Capricorn's Lacewing*</i>	J & S Frisch
2nd	<i>Den. URG1</i>	J & S Frisch

### Class 3.04 - Dendrobium, Phalaenanthe or intermediate type

1st	<i>Den. White Grace</i>	T & M Handley
2nd	<i>Den. Foundry Salad Bowl</i>	J & N Glover

### Class 3.05 - Dendrobium, Spatulata type

1st	<i>Den. Native Gold</i>	R Jenkins
2nd	<i>Den. Elena's Keiki</i>	J Scott

### Class 3.06 - Dendrobium, Any other type

1st	<i>Den. Mousmee</i>	K & R Smith
2nd	<i>Den. ARP 'Henk Wants' x Den. speciosum</i>	J Scott

## Oncidiinae

### Class 4.01 - Oncidiinae, Tolumnia/Zelenkoa type characteristics (ie. Miniature growing)

1st	<i>Rrm. Molly</i>	K & R Smith
2nd	<i>Tolu. Pink Panther</i>	T & M Handley

### Class 4.02 - Oncidiinae, Gom. (Onc.) varicosum type characteristics (Dominant yellow lip)

1st	<i>Gom. Alosuka</i>	J Scott
-----	---------------------	---------

### Class 4.04 - Oncidiinae. Any other type not included in the above

1st	<i>Onc. Jimbo Swarm</i>	J Scott
2nd	<i>Onc. Pacific Pagan</i>	R Jenkins

## Paphiopedilum / Phragmipedium

### Class 5.01 - Paphiopedilum, standard complex hybrid type

1st *Paph.* Matchless T Dean

### Class 5.02 - Paphiopedilum, Maudiae type characteristics

1st *Paph.* Amethyst Foam x *Paph.* Key Lime T & M Handley

2nd *Paph.* Hung Sheng Red Apple x *Paph.* Hung Sheng Wine D Chippendale

### Class 5.03 - Paphiopedilum, Brachypetalum / Parvisepalum type characteristics

1st *Paph.* Sand Dollar T Monks

2<sup>nd</sup> *Paph.* Pinocchio K & M Smith

### Class 5.04 - Paphiopedilum, Multi-floral type

1st *Paph.* Michael Koopowitz D Chippendale

2nd *Paph.* Johanna Burkhardt D Chippendale

### Class 5.05 - Paphiopedilum, Any other type

1<sup>st</sup> *Paph. primulinum* x *Paph.* Pacific Shamrock J Scott

### Class 5.06 - Phragmipedium

1st *Phrag.* Brysa B & H Hilse

2nd *Phrag.* Praying Mantis T Dean

## Phalaenopsis

### Class 6.01 – Phalaenopsis, standard shape, bloom size over 90mm

1st *Phal.* Lianher Golden Beauty B & N Lakey

2nd *Phal.* Ox Firebird x *Phal.* Chian Xen Piano T & M Handley

### Class 6.02 – Phalaenopsis, standard shape, bloom size 60mm to 90mm

1st *Phal.* Mount Lip T & M Handley

2nd *Phal.* Memoria Sarah Robertson x *Phal.* Chian Xen Pearl T & M Handley

### Class 6.03 – Phalaenopsis, standard shape, bloom size under 60mm

1st *Phal.* Lianher Happy Star T & M Handley

2nd *Phal.* Jian San Jie No 3 T & M Handley

### Class 6.04 – Phalaenopsis, any other, bloom size over 60mm

1st *Phal.* Chia-Shing Hot Kiss T & M Handley

2nd *Phal.* Shu Long T & M Handley

## Other Genera

### Class 7.01 - Catasetinae

1st *Cl.* Jumbo Grace T & M Handley

### Class 7.02 – Epidendrum (reed stem type) (Crucifix Orchid)

1st *Epi.* Wedding Valley x *Epi.* Topaz Delight T & J March

2nd *Epi.* Comet Valley T & J March

### Class 7.03 – Bulbophyllum hybrid

1st *Bulb.* Mastersianum x *Bulb.* Brevibrachiatum T & M Handley

### Class 7.04 – Phaius and alliance hybrid

1st *Gp.* Lady Ramona Harris P & M Bennett

### Class 7.06 – Cymbidium, Standard, Intermediate or Pendulous type

1<sup>st</sup> *Cym.* Radiant Ruby T Dean

2nd *Cym.* Sarah Jean T Dean

### Class 7.07 Cymbidium, any other

1<sup>st</sup> *Cym.* Unknown R Jenkins

## Species

### Class 8.01 - Laeliinae (Cattleya, Laelia, Sophronitis or Brassavola only – RHS or Sander accepted)

1st	<i>C. walkeriana</i> var. <i>flamea</i>	J Scott
2nd	<i>C. intermedia</i> var. <i>orlata</i>	J Scott

### Class 8.02 - Vandeeae (excluding Phalaenopsis)

1st	<i>V. tricolor</i> var. <i>suavis</i>	J Scott
2nd	<i>Rhy. gigantea</i>	R Jenkins

### Class 8.03 - Phalaenopsis

1st	<i>Phal. amabilis</i>	T & M Handley
2 <sup>nd</sup>	<i>Phal. schilleriana</i>	T & M Handley

### Class 8.04 - Dendrobium – Australian

1st	<i>Den. canaliculatum</i>	J & N Glover
2nd	<i>Den. amethystoglossum</i>	K & R Smith

### Class 8.05 - Dendrobium -- Exotic

1st	<i>Den. aphyllum</i>	T & J March
2 <sup>nd</sup>	<i>Den. linawianum</i>	J & N Glover

### Class 8.06 - Oncidiinae

1 <sup>st</sup>	<i>Onc. ceboletta</i>	J & N Glover
-----------------	-----------------------	--------------

### Class 8.07 Paphiopedilum

1st	<i>Paph. hirsutissimum</i>	K & R Smith
2 <sup>nd</sup>	<i>Paph. venustum</i>	D Chippendale

### Class 8.10 - Any other Australia Species

1st	<i>Phaius australis</i>	R Jenkins
2nd	<i>Phaius tankervilleae</i>	R Jenkins

### Class 8.11 - Any other Exotic Species

1st	<i>Aslla. africana</i>	R & G Bills
2nd	<i>Den. friedericksianum</i>	B & N Lakey

## Foliage / Fern

### Class 9.01 - Anthurium (var. andreanum or schizeraenum)

1st	<i>scherzerianum</i> var. <i>rothschildianum</i>	J Scott
2nd	Anthurium	J & S Frisch

### Class 9.04 - Bromeliad any other

1st	Bromeliad	K Clarke
-----	-----------	----------

### Class 9.05 - Tillandsia small growing type (ie. ionanthe, stricta etc.)

1st	<i>Tillandsia sprengeliana</i>	J Scott
2nd	<i>Tillandsia</i>	K Clarke

### Class 9.06 - Tillandsia any other (large growing type)

1st	<i>Tillandsia</i> large growing type	M & B Richardson
2nd	<i>Tillandsia</i> large growing type	T & N Craig

### Class 9.07 - Succulent

1st	Echeveria Mexican Giant	J Scott
2nd	Succulent	B & N LAKEY

### Class 9.08 - Cactus

1st	<i>Mammillaria zeilmanniana</i>	J Scott
-----	---------------------------------	---------

### Class 9.09 - Bonsai

1st	Bonsai	J & N Glover
2nd	Bonsai	J & N Glover

### Foliage / Fern (Cont.)
